# Linux gains lossless filesystem

By *srlinuxx*

Created 30/09/2005 - 6:39pm

Submitted by srlinuxx on Friday 30th of September 2005 06:39:19 PM Filed under [Linux](#) [1]

An R&D affiliate of the world's largest telephone company has achieved a stable release of a new Linux filesystem said to improve reliability over conventional Linux filesystems, and offer performance advantages over Solaris's UFS filesystem. NILFS 1.0 (new implementation of a log-structured filesystem) is available now from NTT Labs (Nippon Telegraph and Telephone's Cyber Space Laboratories).
