Media Giddy over Linux Worm

By *srlinuxx*

You might think that the sky is falling the way the media has gone on a feeding frenzy related to a Linux worm. Sorry to disappoint you, but the worm will hardly affect the user base. It's not like the "Code Red" worm which self-replicated malicious code that exploited a known vulnerability in Microsoft IIS servers (CA-2001-13). Rumor has it, Wal-Mart didn't cope with it very well.
