# The Perfect Setup - Mandriva 2006 Free Edition

By *srlinuxx*

Created *30/11/2005 - 11:32pm*

Submitted by srlinuxx on Wednesday 30th of November 2005 11:32:30 PM Filed under [HowTos](#) [1]

This is a detailed description about the steps to be taken to setup a Mandriva 2006 Free Edition based server that offers all services needed by ISPs and hosters (web server (SSL-capable), mail server (with SMTP-AUTH and TLS!), DNS server, FTP server, MySQL server, POP3/IMAP, Quota, Firewall, etc.).

In the end you should have a system that works reliably and is ready for the free webhosting control panel ISPConfig (i.e., ISPConfig runs on it out of the box).

[Full Story](#) [2].
