Ho, ho! Finally! The KDE 4.3 Plasma screencast arrives! It's 10:36 in length and covers some of the nice improvements we've in Plasmaland for 4.3, including:

- The new Air theme
- Small panel sizes
- KWin integration
- Stability & performance improvements (over 2300 bugs.kde.org defect reports triaged and closed during the 4.3 alone!)
- New widgets, including social desktop integration, remember the milk and unit converter
- New DataEngines, including Geolocation
- System tray and job notification improvements
- KRunner improvements in looks, speed and usability
