Constantine, Fedora 12 is going to be out soon. I am really excited and I bet every linuxer will be equally excited and looking forward to try it out. Most of the you will be in a dilemma, whether to do an upgrade or a fresh-install? what's best for my system? In this article I will give you some tips and methods which will help you answer such questions.

Don't you just love your system after an upgrade or a re-install? The whole looks and feel has changed, sometimes things that were not working on your previous installation start working , its amazing. Even though you might not agree with me but I believe that the decision that you take at this point, if right, makes you love your new system even more.

[Here are some points that you should know before starting:](#) [2]
