Data by web metrics firm Net Applications shows that while both Windows and Mac OS lost usage share in May, Linux made a small gain.

Here's the data for May:

- * Windows: 91.28% (down 0.18%)
- * Mac: 5.27% (down 0.05%)
- * Linux: 1.13% (0.08%)

While the gain made by Linux is a small one, it is a gain nonetheless.
