Submitted by srlinuxx on Thursday 26th of January 2006 11:21:08 AM Filed under [Linux](#) [1]

I have been working so hard putting together the biggest baddest selection of Linux games. I have packaged them all up in packages so you can pick and choose what games you want to install. They are all tested and running. I have also set them all up with menu entries.

I currently have Myah OS 1.2 Disk 2 through Disk 6 done. This is 5 full CD's of nothing but bad ass games.

I thought about how much linux users have a hard time finding any fun games or making them work. So I took that idea, since so many seemed to like my distro for the couple small games I had. I decided to make a linux distro for all those Gamers out there that are tired of having to use windows to have fun. So I bring you a Linux OS that has 115 bad ass games. I'm not talking kde games. I'm talking 115 of the best linux games available and a couple that were not ever release on linux but I was about to port them. There was no Single player First Person Shooters for linux. There is multiplayer but accept for The Hunted Chronicles 2 there wasn't any. So I took The Hunted Chronicle 1 and ported it over. Also CodeRED Alien Arena is a great multiplayer game but the Single player CodeRED Battle for Earth and Martcian Chronicles that were only release to Windows. I also ported them both over.

It contains 115 games plus some addon packages like all the flight gear plane, Racer cars and tracks.

These gaming CD are only available to those who donate \$10 but the Base CD will continue to be free. [Donate here](#) [2].

Here is what is on the Disks.

Disk 2 contains All Arcade and Simulator Games:

Arcade:

Alien Blaster 1.1.0

Armagetron AD 0.2.7.1
