Built on LinuxCOE a powerful set of tools recently open sourced by Hewlett Packard, Instalinux makes installing Linux easier than ever.

Typically, installing Linux means downloading (or buying) one or more ISO images, and then clicking through the install screens. In an effort to make Linux installs easier, some smart folks at HP developed LinuxCOE, where a user could choose some basic options through a web interface, and a small (30MB or less) ISO image is generated that can be used for a "hands-free" installation using either Kickstart, AutoYAST, or the Debian Preseed autoinstallers.
