Red Hat has successfully migrated UTI Bank's critical customer relationship management (CRM) applications on the Red Hat Enterprise Linux platform.

According to Javed Tapia, president, Red Hat, Indian subcontinent, "It is very encouraging to see open source technologies finding their way into banks and their critical applications being migrated on open source." He further adds, "UTI joins a whole host of banks who have migrated to Red Hat Enterprise Linux and have seen a significant improvement in performance and manageability coupled with a reduction in operating cost."
