Submitted by srlinuxx on Tuesday 9th of November 2010 08:20:25 PM Filed under [Linux](#) [1]

Back in March, Mike reviewed the Sabayon 5.2 Gnome release and found it to be a well-rounded distribution with only some minor issues. Now, the new 5.4 release is here and includes what Sabayon calls ?Experimental Spins?, which are installable LiveCD?s featuring LXDE, XFCE4, E17 Desktops, a OpenVZ version and ServerBase version as well.

The default look is rather bland with E17, so some eye-candy was needed and you can find many E17 themes and wallpapers all over the net; just google ?e17 themes?, ?e17 wallpapers?.
