64 bit install:

```
install util-linux
```

```
possibly export _POSIX2_VERSION=199209
```

```
possibly export SETUP_LIBC=glibc-2.1
```

```
wget http://www.princessleia.com/tools/ut/ut-install-436-goty.run
```

```
linux32 sh ut-install-436-goty.run
```

```
wget http://icculus.org/~ravage/unreal/unrealgold/unrealgold-install-436.run
```

```
linux32 sh unrealgold-install-436.run
```

Enjoy!

UPDATE: If it runs too fast on modern systems (using NVIDIA cards), try starting X with:

```
export __GL_SYNC_TO_VBLANK=1
```

```
export __GL_SINGLE_THREADED=1
```
