Submitted by srlinuxx on Thursday 16th of December 2010 10:45:05 PM Filed under [KDE](#) [1] [Web](#) [2]

Some of you might see a message if you visit [dot.kde.org](http://dot.kde.org), [forum.kde.org](http://forum.kde.org) or try to edit a page in one of the KDE wikis and wonder what it's all about. There's no need to worry though, everything is proceeding fine.

The sites are being moved to a new server, and it might take some time for your ISP to update their DNS (up to 72 hours). If you see the message, it means that you still try to access the old server. To avoid losing content, the forums etc. have been disabled until the DNS propagation is complete.
