Finally, after 24 Months of constant development Debian Aqueeze 6.0 has been released today, this release comes with many updates and new features, it includes the KDE Plasma Desktop and Applications, the debianGNOME, Xfce, and LXDE desktop environments as well as all kinds of server applications, numerous updated software packages, over 10,000 new packages like the browser Chromium, the monitoring solution Icinga and more.

Debian 6.0 start faster

"Debian 6.0 introduces a dependency based boot system, making system start-up faster and more robust due to parallel execution of boot scripts and correct dependency tracking between them. Various other changes make Debian more suitable for small form factor notebooks, like the introduction of the KDE Plasma Netbook shell."
