LinuMint10 KDE RC is released, this release comes with many new features and system improvements. LinuxMint 10 KDE RC features latest and recently released KDE 4.6, the menu was switched to Lancelot, the Software Manager got a better categorization of software and the use of application icons. For the update manager, added possibility of ignoring updates for a particular package by simply right clicking on the package and tell the Update Manager to ignore updates for this package.

System improvements

Adobe Flash: Linux Mint comes with the latest Adobe Flash "Square", running in full 32-bit or 64-bit (depending on your edition of Linux Mint) native mode. This plugin is faster than its predecessor, especially in full-screen.

Oracle Virtualbox: A new metapackage called "virtualbox-nonfree" was introduced. This package points to the non-open-source version of Virtualbox and provides USB support.
