# Linux Libraries

By *Texstar*

Created *01/06/2011 - 8:27pm*

Submitted by Texstar on Wednesday 1st of June 2011 08:27:12 PM Filed under [Linux](#) [1]

I wish Linux developers who build libraries for Linux would make their new versions backward compatible with the old version. Also wish they would stop changing their library majors. It is a big pain in the ass to have to rebuild source rpm/deb packages simply to relink a package because of a change with the library major. Every time a developer changes their library major, God kills a kitten. Please guys think of the kittens!
