The Gentoo project today announced the official Gentoo Wiki. This step has been a long time coming. When disaster took out most of the volunteer wiki several years ago, a big hole was left. This hole has now been filled by a "herd of proper Gentoo developers."

The basics are in place: broad categories, alphabetized subcategories, further subcategories if needed, and a few pages. Some "getting started" information is available for those who might like to contribute as well as recent Wiki news.
