There is no doubt that Android as a Mobile OS is gaining traction, with a slew of enterprise apps on the horizon, a good number of apps in its app store and the closest competition either Palm OS or Blackberry's offering it can only be a good future for the little green robot.

When you buy Android on a mobile however, you are not always guaranteed to get the same experience across a Samsung, HTC or Motorola who all take the stock google provided Operating System and add their own twist and apps to it.

One of the reasons the OS is popular is the simple fact that you can take what your Mobile phone vendor has done with the phone and throw it away and start again.

I'd like to share with you what i've done on my Samsung Galaxy S in three areas:
