The times have been difficult for many of us this past few years. For Slackware, it's been no exception. Some of you faithful Slackers may have noticed lately that the Slackware home page has been offline. I posted about this at Jeremy's Linux Questions forums. Alien Bob (Eric Hameleers) replied stating that it was an old hardware/lack of funds issue. This is sad. 😞

I am in no way associated with the Slackware Linux project other than being a loyal user of the distribution and a frequent commenter/blogger on the subject of Slackware. I want to say that up front here. That being said, I would like to ask a favor? Please, stop on by the Slackware Store and click on that Donate button (top left side of page). I just did a few minutes ago. I didn't give much. I don't have much to spare, but I did give something.
