Hear ye, hear ye! I proudly take it upon myself as an interested observer and bit of an advocate to proclaim the release of openSUSE 12.3 as achieved. Come one, come all, step up and download the latest from the Geeko.

"openSUSE 12.3 - Awesome as 1-2-3"

Jos Poortvliet, sounding about in the same frame of mind as me, said today, "Dear contributors, friends and fans: The latest release of the openSUSE distribution, version 12.3, is ready for you! After six months of hard work, we are happy to bring you the best mix that Free and Open Source Software has to offer with our unique green sauce - stable, friendly and fun."
