If you?re old, like me?let?s say, over 30 years old?you might remember the television show ?The Dukes of Hazzard?. Waylon Jennings, a popular country music singer during the late 70?s and early 80?s sang the theme song. The lyrics are:

Just the good ol boys, never meaning no harm
Beats all you ever saw, been in trouble with the law
since the day they was born

Many times in IT job settings, you?ll find that you need to become one of ?the good ole boys? in order to accomplish your job. You have to like the things others? like (or pretend to), you have to laugh at the things others? laugh at. In other words, you may have to become all things to all people. It?s stupid that things are this way?but if you don?t change, you?ll find yourself on the outside looking in. I?ve always been one to try and strike the right balance between becoming what my coworkers wanted me to become versus what I want to be.
