# Ubuntu In 2014

By *Roy Schestowitz*

Created *02/01/2014 - 10:24pm*

Submitted by Roy Schestowitz on Thursday 2nd of January 2014 10:24:00 PM Filed under [Ubuntu](#) [1]

2013 was a phenomenal year for Ubuntu. It is difficult to believe that it was just a year ago today that we announced Ubuntu for phones. Since then we have built and released the first version of Ubuntu for phones complete with core apps, delivered Mir in production on the phone, built a vastly simplified and more powerful new app delivery platform complete with full security sand-boxing, created a powerful smart scopes service to bring the power of native search and online content to devices, delivered a new SDK with support for QML, HTML5, and Scopes, built an entirely new developer.ubuntu.com, created extensive CI and testing infrastructure to ensure quality as we evolve our platform, shipped two desktop releases, extended the charm store, delivered Juju Gui, spun up multiple clouds with Juju, and much more.
