Submitted by Rianne Schestowitz on Friday 3rd of January 2014 09:04:17 PM Filed under [Ubuntu](#) [1]

The "out of the box" Ubuntu 13.10 performance from October with its stock package-set is being compared to the near-final version of the Fedora 20 packages as of the time of testing in mid-December (due to travels and being out of the office the last two weeks of December through mid-January). Both Fedora 20 and Ubuntu 13.10 were in their default states and the performance was tested on two systems.
