The UK government now says that Ubuntu 12.04 is the safest operating system available, way ahead of Windows 8 and Mac OS X.

The Communications-Electronics Security Group (CESG) is the UK National Technical Authority for information assurance and they've done a series of tests to find out what is the most secure operating system available for the governmental apparatus.

The security assessment made by CESG included the following categories: VPN, Disk Encryption, Authentication, Secure Boot, Platform Integrity and Application Sandboxing, Application Whitelisting, Malicious Code Detection and Prevention, Security Policy Enforcement, External Interface Protection, Device Update Policy, Event Collection for Enterprise Analysis, and Incident Response.
