Submitted by Roy Schestowitz on Wednesday 5th of March 2014 05:25:47 PM Filed under [Site News](#) [1]

Drupal's very own [Mollom](#) [2] is a [Free/Open Source](#) [3] (collaboratively-developed and freely-shared) software for battling script kiddies and fighting against SPAM. The past 2 weeks were difficult because spammers exploited the fact that we had opened up the site for registration/subscription (to leave comments). After exploring some options for dealing with the problem (spam making it to the front page even!) we found that Mollom was good enough to eliminate almost 100% of all of spam (so far). Hence, for the time being, it seems safe to say now that we beat the script kiddies. Thanks, Mollom! [?](#)
