I read from a link of a link today that Doom: Resurrection of Evil will be supported on Linux come Doom 3 patch 1.3. 🎉 yippee.

Quoting a quote of a quote:

Timothee Besset said on April 13,

"Also, regarding the next Doom 3 patch (version 1.3):

- Resurrection of Evil will be supported on Linux
- release 1.3 has EAX HD support, PunkBuster and bunch of other goodies
- we will release an updated SDK shortly after the patch release
- it's not done yet"
