Chrome OS security holes found, patched

By *Rianne Schestowitz*

Created *18/03/2014 - 7:40pm*

Submitted by Rianne Schestowitz on Tuesday 18th of March 2014 07:40:11 PM Filed under [Linux](#) [1] [Google](#) [2]

Linux is very secure. Google's Linux-based Chrome OS, with its auto-updating and security sandboxing, is even more secure. But, neither is perfect. At Google's own Pwnium hacking contest and HP Zero Day Initiative's (ZDI) annual Pwn2Own hacking contest, three new sets of security problems were found in Chrome OS... and then immediately patched.
