If you're fed up with Windows entirely, or you don't feel like spending money on a new Windows license, now might be a great time to consider switching to Linux. There are a number of distributions that are new-user friendly, and if you're worried that living in the Linux world means you're doomed to memorizing terminal commands and dealing with unhelpful communities when troubleshooting, don't be. Finding Linux help is easy these days, and many of the communities around some of the more newbie-friendly distributions are rather welcoming. Best of all, Linux is free, and you can't beat that.
