# Designing a Prize for Usable Cryptography

By *Rianne Schestowitz*

Created 24/04/2014 - 3:18pm

Submitted by Rianne Schestowitz on Thursday 24th of April 2014 03:18:33 PM Filed under [OSS](#) [1] [Security](#) [2]

To that end, EFF is evaluating the feasibility of offering a prize for the first usable, secure, and private end-to-end encrypted communication tool. We believe a prize based on objective usability metrics (such as the percentage of users who were able to install and start using the tool within a few minutes, and the percentage who survived simulated impersonation or man-in-the-middle attacks) might be an effective way to determine which project or projects are best delivering communication security to vulnerable user communities; to promote and energize those tools; and to encourage interaction between developers, interaction designers and academics interested in this space.
