All the supported platforms have received this new update, but this is a maintenance build that's mostly about bug fixes, which means that it fits perfectly in what has been made available so far, with no major surprises.

LibreOffice 4.1.6 is the last release of the LibreOffice 4.1 family, targeted to large deployments in enterprises and public administrations, which should always be supported by TDF certified developers. Today, we users can choose

between LibreOffice 4.2.3 Fresh, targeted to early adopters and technology enthusiasts, and LibreOffice 4.1.6 Stable targeted to enterprise deployments and conservative users,? said Florian Effenberger, TDF executive director.
