All of us in the OpenMandriva Community are pleased to announce the release of OpenMandriva- Lx 2014.0 Phosphorus!

This release is the culmination of a huge effort by our community to bring a fresh, new release of good quality to our supporters and ? to the world!

The name of our release, taken from the Greek meaning ?Light-Bringer?, describes our hopes for this work. What you will have on your disks in a few hours will, we hope, will showcase some of what our predecessors might have done if they had continued their work. We wanted to rekindle the spirit and hope that made their efforts so exciting and in doing so pass that same feeling on to you.
