Submitted by Rianne Schestowitz on Tuesday 6th of May 2014 07:10:11 PM Filed under [GNU](#) [1]

We are pleased to announce the availability of GNU Xnee 3.19

GNU Xnee is a suite of programs that can record, replay and distribute user actions under the X11 environment. Think of it as a robot that can imitate the job you just did. GNU Xnee can be used to:

Automate tests

Demonstrate programs

Distribute actions

Record and replay ?macro?

Retype the content of a file
