It has been a while since I've done a review, and I apologize for that. This week isn't actually getting any less busy for me; last night I finished my undergraduate thesis and submitted it to my thesis advisor, and hopefully there aren't too many major revisions that I would need to make. Beyond that, though, I still have problem sets, a midterm exam, and final projects to finish. I'm just doing this review now because finishing the thesis was exhausting, and I need a short break before I can get back to work. In that time, I'm reviewing OpenMandriva Lx 2014.0.
