Two years ago the Qt3D module was showing lost of promise for 3D support within the popular, cross-platform toolkit. However, just before the Qt 5.0 release, Nokia shutdown their Qt Brisbane office that among other Qt modules was responsible for the work on Qt3D. Nokia's late actions with Qt prior to selling it off to Digia was a a big blow and led to Qt3D being demoted. Fortunately, Qt3D 2.0 is coming along as a maintained, rewritten version of the 3D support for Qt.
