XBMC, an open source (GPL) software media player and entertainment hub for digital media that is available for multiple platforms, is now at version 13.1 RC1.

- [Rhythmbox 3.0.3 ?Devilfish? Officially Released](#) [5]

Rhythmbox 3.0.3, an integrated music management application, originally inspired by Apple's iTunes and designed to work well under the GNOME desktop environment, has been released.

- [telnet: The fundamental tool for entertainment](#) [6]

As I understand it, telnet just gives you a tool for accessing the telnet protocol, probably in the same way that a browser is a tool for accessing http (and other) content. So once it's up and running, there's not much of telnet itself to see.

It is said that 95% of all supercomputers run Linux, so why do they still not get an invitation to the party? If you look at any cloud storage review, you will quickly notice that Linux users are often times left as an afterthought. Too many cloud service providers give Windows and Mac more than their share of the limelight despite the plethora of user-friendly capabilities of Linux. So, it can be asked, what do cloud storage providers have to offer Linux users?
