The Document Foundation announces LibreOffice 4.3, the 8th major release of the free office suite since the birth of the project in September 2010. The application includes the combined effort of thousands of volunteers and hundreds of developers, and has reached a point of maturity that makes it suitable for every kind of deployment, if backed by value added services by the growing LibreOffice ecosystem.

LibreOffice 4.3 offers a large number of improvements and new features.
