SUSE Security has announced that SUSE Linux 9.1 (Personal and Professional edition) will be discontinued soon. Having provided security-relevant fixes for more than two years, vulnerabilities found in SUSE Linux 9.1 after June 15, 2006 will not be fixed.

This announcement holds true for SUSE Linux 9.1 only. As usual, SUSE will continue to provide update packages for the following products:

SUSE Linux 9.2
SUSE Linux 9.3
SUSE Linux 10.0
and
SUSE Linux 10.1
