Submitted by Roy Schestowitz on Wednesday 24th of December 2014 09:19:12 PM Filed under [PCLOS](#) [1]

PCLinuxOS 2014.12 isos have been released for Full Monty, KDE, MATE and LXDE. Highlights include kernel 3.18.1, ffmpeg 2.5.1, mesa 10.4.0, SysVinit (no systemd) and all popular applications such as Firefox, Thunderbird, LibreOffice and VLC have been updated to their latest versions. Please note if you have been keeping up with your PCLinuxOS software updates then there is NO NEED to install fresh from a 2014.12 iso. These ISOS are final releases based on legacy technology. Future releases will default to grub2 and support uefi and gpt partition formats.
