'One frickin' user interface for Linux'

By *Roy Schestowitz*

Created 29/12/2014 - 5:12pm

Submitted by Roy Schestowitz on Monday 29th of December 2014 05:12:05 PM Filed under [Linux](#) [1]

It's almost 2015 now, and it turns out he was right. That "1FUI" is called whatever Android has, and it has made Linux the dominant player in the next big computer revolution. Linux does great in servers, embedded stuff, supercomputing, and utterly owns mobile computing (Apple people, the world is bigger than the US, UK, and Australia).

Linux didn't need a 'year of desktop Linux' after all.
