- [Mageia was at SCaLE 14x](#) [2]

Mageia made it to SCaLE 14x for the first time in sunny California, with one of our dedicated QA deputy leaders to man the booth.

Bill Kenney, or wilcal as he is known here, did an amazing job running the Mageia booth at SCaLE. This is an extract from his report on the event.

The Mageia booth was located right in the centre of the Pasadena Convention Center on January 22nd ? 24th. Friday saw the highest traffic, Saturday was quieter, but lots of families came down to see the exhibits, which is always nice to see.

- [Upgrading to Mageia 5](#) [3]

To be honest, today I was postponing the upgrade because the machine, a rather old Toshiba Satellite which, oh horror, came with Windows VISTA preloaded, put up a fight when I installed Mageia 2 to it.
