abcnews has a [transcript](#) [2] of the Peter Jennings interview with Sat^H^HBill Gates. I'd like to throw in some clever jabs and sarcastic remarks, but truth is I couldn't make it past the "Security is, I would say, our top priority because for all the exciting things you will be able to do with computers ? organizing your lives, staying in touch with people, being creative ? if we don't solve these security problems, then people will hold back."

So, I'm just biting my tongue... until I can stomach the rest...
