PCLinuxOS developer Texstar has had the great pleasure of announcing the availability of July's respin ISO image for the PCLinuxOS 64 MATE Edition operating system, version 2016.07.

PCLinuxOS 64 2016.07 MATE comes exactly one month after the debut of June's update of the distribution built around the customizable and lightweight MATE desktop environment, and it looks like it's full of goodies. For example, the distro is now powered by the latest and most advanced kernel, Linux 4.6.3.
