On August 2, 2016, the ROSA Labs was more than happy to inform us about the availability of the ROSA Desktop Fresh R8 GNU/Linux operating system designed especially for Russian-speaking users.

Based on the latest ROSA 2014.1 platform, the ROSA Desktop Fresh R8 Linux distribution ships with no less than flavors featuring the KDE 4, KDE Plasma 5, GNOME, and MATE desktop environments, and two years of extended support, which means that you'll receive software updates and security patches until Fall 2018.
