As we're getting closer to the end of the year, Mageia has a present for you! We are very pleased to announce the release of Mageia 5.1!

This release ? like Mageia 4.1 was in its time ? is a respin of the Mageia 5 installation and Live ISO images, based on the Mageia 5 repository and incorporating all updates to allow for an up to date installation without the need to install almost a year and a half worth of updates. It is therefore recommended for new installations and upgrades from Mageia 4.

The new images are available from the downloads page, both directly and through torrents.
